Thank you for getting back to me Angela. We look forward to discussing the Phase III comments and any update you may have regarding inducing DNAPL into the wells by pumping them.

Elaine

Hi Elaine,

I apologize for the delay in getting back to you.

I am in the process of finalizing my review of the Phase III, and will need a few days to look over your comments as well as Nobis' comments. I would also like to review the City's comments on the Phase III. Once I have that in place, I'll contact you to set up a time to discuss.

Regarding the requirement for a modification, we would not require a written modification plan at this time. The issue would be addressed in their next status report. In the meantime, the decision to not operate the system as planned is not a final decision. As I understand it, if and when DNAPL is observed again, the remainder of the system will be constructed and put into operation.

I believe that Gerard talked to Ginny about possibly pumping the wells to induce the NAPL to re-occur. We will keep you updated on that.

Thanks,

Angela Gallagher

Subject: Aerovox Weekly Call Follow Up

Hi Angela,

During the weekly call yesterday, Marilyn noted that the layout/design for trailer-mounted free product recovery system will be finished, however, building of system will be suspended until NAPL is observed in the wells. I assume she is referring to the new recovery wells and the existing groundwater monitoring wells.

Would this necessitate a modification to the approved IRA plan, i.e., not going forward with building the recovery system as approved by MassDEP? EPA is concerned that not activating the system may further delay DNAPL recovery and potentially effect the effectiveness and timeframe for the Phase III comprehensive remedy which is at least partially dependent on DNAPL recovery taking place prior to remedy implementation.

We would like to discuss this with you at your earliest convenience. In addition, we would also like to meet with you soon to discuss our comments on AVX's Phase III submittal.

Thanks for your consideration,

Elaine
